Subject: FW: PRISON - ADVICE REQUIRED
Date: Sunday, March 29, 2020 11:35 UTC
Attachments: image001.png (31.8 KB)

Julian- please see the notes below and the response from [REDACTED]. To be advised to make home-made / DIY masks to prevent C19 infection for prison officers, when 20,000 face masks are now here and more coming, does not seem to address the matter seriously, nor provide a defensible position to ensure the safety and well-being of staff, or prisoners and especially if some die from C19. We must all have done what we can to prevent this and deaths amongst the wider population, that could be caused by prisoner infections impacting adversely on ICU capacity at a critical time.

I assume you understand what we are trying to achieve and its covered in the notes to [REDACTED] below. In summary - we are trying to ensure we prevent C19 infection for as long as possible from entering the prison, and when it does to slow down the infection rate, and keep our most vulnerable prisoners from becoming unwell and blocking ICU beds at a critical peak of infection for the Island as a whole. When we now have 20,000 masks and more coming, to be told to make DIY masks does not seem to recognise this strategy nor provide the protection we need to give to our staff in SoJPS, who deal with prisoners at close proximity every day. After HCS colleagues we probably have the greatest exposure to C19 risks of any other service. We don't have the luxury of social distancing in all we do by the nature a prison. We have taken many measures to protect, distance and isolate, however appropriate PPE is now the next step to Protect, Prevent and Delay. We cant wait for C19 to become widespread in the prison before deploying PPE. It may then be too late to avoid unnecessary infections amongst staff and prisoners, and may lead to avoidable deaths.

The message that we are having to use DIY masks may also lead to prisoners taking the matter to the media or their lawyers for failing to provide adequate protection. The JPSA may also react and could take this to the media or other politicians as they have done before. Some of their members have been asking when will they be issued PPE? To date we have informed them we don't have sufficient PPE on the Island, and are waiting for it to arrive, and we are not at the point of needing it. I now think we have sufficient PPE and with the rapid increase in C19 positive rate and with the anticipated peak in April, we should now deploy widely in the prison for all the reasons outlined. Its not about preferential treatment but recognising risks in the prison which are quite unique, and how we could impact on JGH ICU capacity if we don't get this right.

Your assistance to ensure we have appropriate PPE at the correct time its needed, will be appreciated. We now have sufficient PPE on the Island with more coming and to delay issuing to SoJPS staff seems to be high risk, from many angles. Most importantly, once infected in the prison, it will most likely rapidly spread despite our best efforts, and we may impact on ICU capacity at the peak of infection on the Island, which may cost the lives of ordinary citizens let alone prisoners.

Best wishes
Nick

Hi [REDACTED]

Could we get some of the 20,000 masks for this week, while DIY masks are made up? It would take us a few days/ a week to make up 200-400 DIY masks

Thanks

Nick

Subject: RE: PRISON - ADVICE REQUIRED

1 Hi Nick- aim is to use cloth masks for day to day use; if clinical indication use PPE. Any mask will reduce inoculum size and a small inoculum will better allow the immune system to catch up.- milder infection.

2 have copied [REDACTED] in - [REDACTED] is coming up with 2 designs- need cloth - will be seeking donated cloth

3 any masks will have to be washed and tumble dried to ensure hygiene before distribution - and of course can be dry heat (oven) or wash decontaminated at end of day.

Will revert

Hi [REDACTED]

Ok - what about the 20,000 masks that arrived.

We looked at this DIY option last week but could not proceed due to clinical concerns? And litigation if a prisoner or staff died having worn a diy mask and not a clinically made one?

[REDACTED] has responded and we could mobilise and produce asap. [REDACTED] will activate this if we get guidance as to design and clinical/ hygiene issues.

Best wishes

Nick

Subject: RE: PRISON - ADVICE REQUIRED

Importance: High

Dear [REDACTED]

Given the Island now has 20,000 face masks, would you be able to consider now the proposal for SoJPS to move to face mask wearing for prisoners and staff, given we have limited means to distance in a prison. Our staff have to enter prisoners cells, and be closer than 2m to prisoners.

To reiterate we are not seeking any preferential treatment but it is driven solely by a desire to ensure the prison doesn't become a major burden on the JGH ICU as the Island hits its peak toward the end of April.

I appreciate the previous reference to care homes as a possible comparison. I suspect it is a flawed one as Social Distancing in a care home, may be much easier than in a prison, where we have [REDACTED] of our prisoners doubled up ie 2 in cell that is 5m square, and the nature of a prison is confined and close contact inevitable.

can I ask you to reconsider and let me know.

Best wishes
Nick

Dear [REDACTED]

Thanks for responding. A call would be appreciated but I know you are busy. My phone remains on 24 / 7 due to my role.

Rest assured I am looking at what the UK prisons are doing and all possible options, including seeing if we can manufacture our own face masks.

I can only flag to you how I think we can best keep from flooding ICU at a critical time and prevent some avoidable deaths, by using PPE along with all the other measures we have in place.

Best wishes
Nick

Hi Nick

I really wasn't dismissing out of hand but just rushing through emails.- we really have got limited PPE only 4400 surgical masks at the moment - trying to get more.

The estimate for HMP is 2100 masks a week

On top of that we have similar concerns in care homes- much older and more frail.

And later increasing numbers.

Can provide aprons and gloves but handwashing all round better- gloves get contaminated just like hands

What are the UK doing- I am sure you have looked at this - but that might give us some ideas.

Happy to discuss but solution cannot be PPE except where needed to look after infected or suspect cases as I see it

Nick

Cameron <N.Cameron@gov.je<mailto:N.Cameron@gov.je>>
Subject: RE: PRISON - ADVICE REQUIRED
Importance: High

Dear [REDACTED]

Please be assured we are doing all the things you suggest and many more. We do however wish to avoid the prison having a large number of prisoners unwell, and as we all know the prison is unrepresentative of the wider population with a high number of prisoners who are older and / or have significant ULH Conditions.

If C19 enters the prison, given the age and ULH Conditions of up to [REDACTED] prisoner, we could rapidly overwhelm the hospital with acute cases. Our aim is to avoid this at all costs- hence all the measures we have taken to prevent, protect and delay. And now suggesting some more that may delay longer, and then flatten even more when C19 does enter our population, as it eventually will despite all our best efforts.

As you will be fully aware the prison is different from the community and I would ask that before you instantly dismiss our idea of putting staff and prisoners in PPE to "flatten the curve in the prison" to such an extent we give the hospital capacity to manage the rest of the islands C19 patients as it hits its peak, that we have a conf call to discuss.

I fear failure to keep the prison population out of the Islands C19 peak could lead to swamping JGH ICU and also lead to avoidable deaths in the prison or wider population, as a situation in the prison that was preventable means other citizens don't get access to ICU when needed. We want to take all measures we can to ensure we do not impact adversely on the Islands life saving measures that you are leading.

Please can we have a max 30 min conference call before jumping to the decision of simply -"We don't have that quantity of PPE." We are trying to keep prisoners out of ICU for the wider benefit of all other citizens, we are not seeking any preferential access to something we don't have. We are being responsible and proactive as part of the island wide strategy to save lives.

Best wishes

Nick

We don't have that quantity of PPE.
Can they look at how they can implement social distancing and better hygiene.
May need to separate by time and area. Which means significant alteration in the way they usually operate
Anyone with flu like syms to isolate till end symptoms- surgical mask for inmate & PPE for staff looking after such individuals when in contact
Staff with syms not to come in

[REDACTED]
Cc: [REDACTED]
Subject: PRISON - ADVICE REQUIRED

Afternoon [REDACTED]

I have just spoken to Nick Cameron and [REDACTED]

As you are aware all non-essential volunteers and visiting has stopped

All prisoners 65 years of age and those in the at risk category segregated in a different area of the prison (approx. [REDACTED] in total)

Isolation wing set aside for any COVID 19 patients

If officers unwell they are sent home according to COVID-19 criteria

All staff being directed to the helpline for advice (swabbed if indicated)

Prisoners - No suspected cases identified

Prison on amber due to staff sickness

[REDACTED] and [REDACTED] are trying to ensure that everything that can be done to 'flatten the curve' has been implemented.

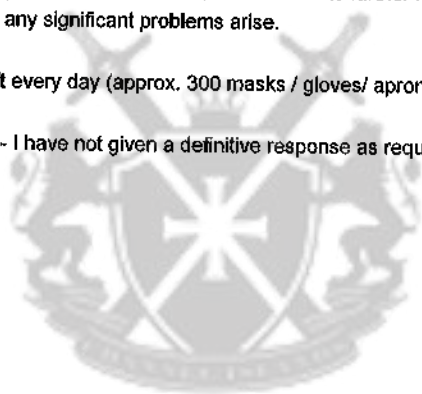

As it is very difficult to maintain distancing between prisoners and officers, and in order to further reduce the risk of cross infection, Nick has asked if the prison officers should be wearing PPE before any significant problems arise.

There are [REDACTED] staff with an estimated [REDACTED] on shift every day (approx. 300 masks / gloves/ aprons would be required daily).

Nick is happy to have a conference call to discuss - I have not given a definitive response as require your input

Kind regards

[REDACTED]

Subject: RE: PPE for Blue Light services and Prison Service
Date: Sunday, March 29, 2020 10:48 UTC
Attachments: image002.png (31.8 KB), image003.png (18.4 KB)

Julian - following your note of 26 March - can you provide an update on PPE provision for JHA. And in the light of the SCG yesterday, where we were all made aware that 20,000 face masks have now arrived. I assume more to follow this week onwards, now the UK supply is being sorted?

Can you confirm that the JHA services will now be provided with appropriate PPE to keep our staff safe and well, to ensure we have as many staff at work and can slow the impact as much as possible to give us all capacity to protect the island as we enter the more acute phase of C19 infections.

Appropriate and timely deployment of PPE will play a major in ensuring we can sustain our ability to deliver, protect the public and ultimately save lives. Failure to deploy in a timely way, when PPE is now available to our teams, may expose them to an avoidable risk, harm and possibly the avoidable death of one of our officers/staff or those in our care.

We all appreciate that to date due to a shortage of PPE, priority has been to ensure HCS colleagues had sufficient and were being prioritised so they could deal with positive cases and those requiring hospitalisation. However, with the 20,000 more masks and other PPE now available, we should now be able to ensure that all front line services are provided with appropriate PPE. JHA services after HCS will have most exposure to C19 infection.

Best wishes
Nick

Subject: PPE for Blue Light services and Prison Service
Importance: High

Good evening [REDACTED]

I am not sure how the blue light services and the Prison Service have approached the issue of PPE, however following the SCG today and as [REDACTED] am making a combined request to make available appropriate PPE for emergency service staff and critical prison service staff. This is necessary for their protection, reassurance and those they are dealing with and essential to maximise the opportunity to retain staff at work. Services are approaching [REDACTED] absence rate already and if it increases critical service will be jeopardised. Could you please let me know what the position is to prioritise services and how we can increase the availability of PPE for these services.

Many thanks.

Hi Nick,

[REDACTED] had a conversation with [REDACTED] and he said he could source 20,000 surgical face masks at 0.45 per unit, total 9,000 + delivery to Jersey of approximately 500, he can also get 10,000 of the N95 masks (provide a seal around the nose and mouth and prevent finer particles) at a cost of 4.50 per unit, total 45,000 + delivery to Jersey at approximately 500. To secure the order he requires a decision by Close of play today as the Americans are buying up everything, let me know if you want to proceed, cheers

Julian

Thanks for response. I think helpful to clarify a few things.

It is being managed carefully and sensibly.

Appropriate guidance is being given to SoJPS staff about what PPE to wear and when.

The intent of the proposal is to move to the next stage of prevent/delay which requires appropriate PPE to be able to do this. ie face masks. We have many measures we have in place. [redacted] understands why we want and need barriers for spreading in the prison setting. Hence cloth mask option [redacted] suggests.

I understand your reference to other services - however they do not manage people in such close proximity 24/7. Our closest comparison is with HCS. Hence raising it with [redacted] who is on the TSG for his consideration, [redacted] guidance to the HCS cell and decision. My [redacted] was also in discussion with [redacted] and [redacted] late last week and I also talked to [redacted] on the phone, who understood and supported the concept if PPE existed. The 20,000 arriving meant [redacted] etc could then reconsider with PPE available.

I know [redacted] is doing a great job. Many people are.

That doesn't stop valid proposals, options and concerns being raised.

I will do all I can to ensure we play a part in keeping the island safe, looking after my staff well being and ensuring no prisoners die if avoidable.

[redacted] does specifically ask in the email chain below if we can make the masks in the prison (Prisoners not our staff.) WI/schools also mentioned by [redacted] No mention by [redacted] of firms doing this. Seems a DIY cottage industry approach versus commercial mobilisation? I would prefer the latter. I suggested some face masks until we have the diy ones- [redacted] gets the idea we are suggesting to delay/slow otherwise [redacted] would not suggest face masks of any kind. Any barrier will help slow it. And in a prison setting we arent always able maintain 2m. Especially with cell sharing. Staff are now our main potential transmission route in for infection. Hence face masks.

We terms of comms. We have been raising at TCG and SCG and will continue to do so.

We all have a part to play in getting the Island through this with a minimum loss of life, and I am trying to ensure the prison adds to HCSs efforts led by [redacted] and doesn't have a negative impact at a critical time in the Islands response plans.

We are all doing all we can.

If we can get face masks of any sort it will help delay and slow infection- buying us all time to flatten infection escalation and ensure the hospital has capacity esp ICU.

Regards
Nick

[cid:image002.png@01D5ED80.D2FD4C70]

----- End Of Message -----

access to advice and prioritisation of decisions is made appropriately. [REDACTED]

We discussed yesterday at the SCG the need for coordination of PPE requests, the cell HCS have set up to manage requests and we must follow that procedure. The [REDACTED] will coordinate all requests and work with the HCS cell.

The reference to cloth PPE is a way of accessing more PPE and these will be made by firms, not by your staff.

I would ask please you keep your staff in an informed place re the MOH advice, as all your staff do not need PPE and don't need to use it all the time. Other services are having similar conversations with their staff and we need to be measured in our approach. We are doing everything we can to secure more PPE.

You will no doubt continue to manage the prison as we discussed on a call yesterday to mitigate the risks and early prevention measures will assist that in increasing the distancing, longer hours in cells etc, again as we discussed.

Regards

JB

Subject: FW: PRISON - ADVICE REQUIRED

Julian- please see the notes below and the response from [REDACTED]. To be advised to make home-made / DIY masks to prevent C19 infection for prison officers, when 20,000 face masks are now here and more coming, does not seem to address the matter seriously, nor provide a defensible position to ensure the safety and well-being of staff, or prisoners and especially if some die from C19. We must all have done what we can to prevent this and deaths amongst the wider population, that could be caused by prisoner infections impacting adversely on ICU capacity at a critical time.

I assume you understand what we are trying to achieve and its covered in the notes to [REDACTED] below. In summary - we are trying to ensure we prevent C19 infection for as long as possible from entering the prison, and when it does to slow down the infection rate, and keep our most vulnerable prisoners from becoming unwell and blocking ICU beds at a critical peak of infection for the Island as a whole. When we now have 20,000 masks and more coming, to be told to make DIY masks does not seem to recognise this strategy nor provide the protection we need to give to our staff in SoJPS, who deal with prisoners at close proximity every day. After HCS colleagues we probably have the greatest exposure to C19 risks of any other service. We don't have the luxury of social distancing in all we do by the nature a prison. We have taken many measures to protect, distance and isolate, however appropriate PPE is now the next step to Protect, Prevent and Delay. We cant wait for C19 to become widespread in the prison before deploying PPE. It may then be too late to avoid unnecessary infections amongst staff and prisoners, and may lead to avoidable deaths.

The message that we are having to use DIY masks may also lead to prisoners taking the matter to the media or their lawyers for failing to provide adequate protection. The JPSA may also react and could take this to the media or other politicians as they have done before. Some of their members have been asking when will they be issued PPE? To date we have informed them we don't have sufficient PPE on the Island, and are waiting for it to arrive, and we are not at the point of needing it. I now think we have sufficient PPE and with the rapid increase in C19 positive rate and with the anticipated peak in April, we should now deploy widely in the prison for all the reasons outlined. Its not about preferential treatment but recognising risks in the prison which are quite unique, and how we could impact on JGH ICU capacity if we don't get this right.

Your assistance to ensure we have appropriate PPE at the correct time its needed, will be appreciated. We now have sufficient PPE on the Island with more coming and to delay issuing to SoJPS staff seems to be high risk, from many angles. Most importantly, once infected in the prison, it will most likely rapidly spread despite our best efforts, and we may impact on ICU capacity at the peak of infection on the Island, which may cost the lives of ordinary citizens let alone prisoners.

Best wishes
Nick

Dear [REDACTED] and [REDACTED]

Given the Island now has 20,000 face masks, would you be able to consider now the proposal for SoJPS to move to face mask wearing for prisoners and staff, given we have limited means to distance in a prison. Our staff have to enter prisoners cells, and be closer than 2m to prisoners.

To reiterate we are not seeking any preferential treatment but it is driven solely by a desire to ensure the prison doesn't become a major burden on the JGH ICU as the Island hits its peak toward the end of April.

I appreciate the previous reference to care homes as a possible comparison. I suspect it is a flawed one as Social Distancing in a care home, may be much easier than in a prison, where we have [REDACTED] of our prisoners doubled up ie 2 in cell that is 5m square, and the nature of a prison is confined and close contact inevitable.

can I ask you to reconsider and let me know.

Best wishes
Nick

Nick

Cameron <N.Cameron@gov.je<mailto:N.Cameron@gov.je>>
Subject: RE: PRISON - ADVICE REQUIRED
Importance: High

Dear [REDACTED]

Please be assured we are doing all the things you suggest and many more. We do however wish to avoid the prison having a large number of prisoners unwell, and as we all know the prison is unrepresentative of the wider population with a high number of prisoners who are older and / or have significant ULH Conditions.

If C19 enters the prison, given the age and ULH Conditions of up to [REDACTED] prisoner, we could rapidly overwhelm the hospital with acute cases. Our aim is to avoid this at all costs- hence all the measures we have taken to prevent, protect and delay. And now suggesting some more that may delay longer, and then flatten even more when C19 does enter our population, as it eventually will despite all our best efforts.

As you will be fully aware the prison is different from the community and I would ask that before you instantly dismiss our idea of putting staff and prisoners in PPE to "flatten the curve in the prison" to such an extent we give the hospital capacity to manage the rest of the islands C19 patients as it hits its peak, that we have a conf call to discuss.

I fear failure to keep the prison population out of the Islands C19 peak could lead to swamping JGH ICU and also lead to avoidable deaths in the prison or wider population, as a situation in the prison that was preventable means other citizens don't get access to ICU when needed. We want to take all measures we can to ensure we do not impact adversely on the Islands life saving measures that you are leading.

Please can we have a max 30 min conference call [REDACTED] We are trying to keep prisoners out of ICU for the wider benefit of all other citizens, we are not seeking any preferential access to something we don't have. We are being responsible and proactive as part of the island wide strategy to save lives.

Best wishes

Nick

Subject: PRISON - ADVICE REQUIRED

Afternoon [REDACTED]

I have just spoken to Nick Cameron and [REDACTED]
As you are aware all non-essential volunteers and visiting has stopped
All prisoners 65 years of age and those in the at risk category segregated in a different area of the prison (approx [REDACTED] in total)
Isolation wing set aside for any COVID 19 patients

If officers unwell they are sent home according to COVID-19 criteria
All staff being directed to the helpline for advise (swabbed if indicated)
Prisoners - No suspected cases identified

Prison on amber due to staff sickness

[REDACTED] and [REDACTED] are trying to ensure that everything that can be done to 'flatten the curve' has been implemented.

As it is very difficult to maintain distancing between prisoners and officers, and in order to further reduce the risk of cross infection, Nick has asked if the prison officers should be wearing PPE before any significant problems arise.

There are [REDACTED] staff with an estimated [REDACTED] on shift every day (approx. 300 masks / gloves/ aprons would be required daily).

Nick is happy to have a conference call to discuss - I have not given a definitive response as require your input

Kind regards
[REDACTED]

Julian

Thanks for response. I think helpful to clarify a few things.

It is being managed carefully and sensibly.

Appropriate guidance is being given to SoJPS staff about what PPE to wear and when.

The intent of the proposal is to move to the next stage of prevent/delay which requires appropriate PPE to be able to do this. ie face masks. We have many measures we have in place [REDACTED] understands why we want and need barriers for spreading in the prison setting. Hence cloth mask option he suggests.

I understand your reference to other services - however they do not manage people in such close proximity 24/7. Our closest comparison is with HCS. Hence raising it with [REDACTED] who is on the TSG for his consideration, his guidance to the HCS cell and decision. My [REDACTED] was also in discussion with [REDACTED] and [REDACTED] late last week and I also talked to [REDACTED] on the phone, who understood and supported the concept if PPE existed. The 20,000 arriving meant [REDACTED] etc could then reconsider with PPE available.

I know [REDACTED] is doing a great job. Many people are.

That doesn't stop valid proposals, options and concerns being raised.

I will do all I can to ensure we play a part in keeping the island safe, looking after my staff well being and ensuring no prisoners die if avoidable.

[REDACTED] does specifically ask in the email chain below if we can make the masks in the prison (Prisoners not our staff.) WI/schools also mentioned by [REDACTED]. No mention by [REDACTED] of firms doing this. Seems a DIY cottage industry approach versus commercial mobilisation? I would prefer the latter. I suggested some face masks until we have the diy ones- [REDACTED] gets the idea we are suggesting to delay/slow otherwise [REDACTED] would not suggest face masks of any kind. Any barrier will help slow it. And in a prison setting we arent always able maintain 2m. Especially with cell sharing. Staff are now our main potential transmission route in for infection. Hence face masks.

We terms of comms. We have been raising at TCG and SCG and will continue to do so.

We all have a part to play in getting the Island through this with a minimum loss of life, and I am trying to ensure the prison adds to HCSs efforts led by [REDACTED] and doesn't have a negative impact at a critical time in the Islands response plans.

We are all doing all we can.

If we can get face masks of any sort it will help delay and slow infection- buying us all time to flatten infection escalation and ensure the hospital has capacity esp ICU.

Regards
Nick

Nick,

I have read the email thread and understand your concerns, however we have to manage this carefully and sensibly to ensure the provision of PPE,

access to advice and prioritisation of decisions is made appropriately. I would ask that you do not email directly anyone in Health from now on. [REDACTED] and [REDACTED] team are doing an excellent job and are under immense pressure, as any MOH is currently due to the virus. If you have further concerns please let me know.

We discussed yesterday at the SCG the need for coordination of PPE requests, the cell HCS have set up to manage requests and we must follow that procedure. The TCG will coordinate all requests and work with the HCS cell.

The reference to cloth PPE is a way of accessing more PPE and these will be made by firms, not by your staff.

I would ask please you keep your staff in an informed place re the MOH advice, as all your staff do not need PPE and don't need to use it all the time. Other services are having similar conversations with their staff and we need to be measured in our approach. We are doing everything we can to secure more PPE.

You will no doubt continue to manage the prison as we discussed on a call yesterday to mitigate the risks and early prevention measures will assist that in increasing the distancing, longer hours in cells etc, again as we discussed.

Regards

Subject: FW: PRISON - ADVICE REQUIRED

Julian- please see the notes below and the response from [REDACTED]. To be advised to make home-made / DIY masks to prevent C19 infection for prison officers, when 20,000 face masks are now here and more coming, does not seem to address the matter seriously, nor provide a defensible position to ensure the safety and well-being of staff, or prisoners and especially if some die from C19. We must all have done what we can to prevent this and deaths amongst the wider population, that could be caused by prisoner infections impacting adversely on ICU capacity at a critical time.

I assume you understand what we are trying to achieve and its covered in the notes to [REDACTED] below. In summary - we are trying to ensure we prevent C19 infection for as long as possible from entering the prison, and when it does to slow down the infection rate, and keep our most vulnerable prisoners from becoming unwell and blocking ICU beds at a critical peak of infection for the Island as a whole. Julian - happy to discuss. However as you would guess i have explored many many options, and we are already operating  more units to protect and separate the popn however with  staff off doing this means we are already very stretched.

In reality our staff our the biggest risk of bringing C19 in as it becomes more widespread in the community. Hence needing face masks to create more of a "barrier" between prisoners and staff. We need 300 masks a day. We can creat social distancing to a degree but the physical limits of a prison prevent this.

Happy to discuss. But PPE is whats needed to really slow the next phase as we start the steep climb of the curve.

I am most concerned that the prison peak of infection corresponds with the communities and this costs other citizens their life.

Best wishes

Nick

Nick,

I am keen to discuss with you alternative plans to keep your business going, what options you have to/can take now to change the layout of the prison, keep blocks of prisoners/staff etc separate, have a separate wing for any new incomers etc. I'm sure you've considered this but would be good to discuss please and see if JHA or gov can assist in any way.

Thank you.

Thanks Julian

We are really all working hard to ensure we keep providing services across JHA. And importantly dont end up blocking icu beds with prisoners that other islanders need who deserve that care. I think we can save islanders lives this way.

Best wishes
Nick

Thanks Nick.

As anticipated, availability of PPE kit will undoubtedly be more and more acute, as the virus takes hold. Rather than all JHA colleagues seeking PPE from different sources, is there a single point of contact where we can get access to the protective kit we need for our staff?

Thanks.

Subject: RE: Emergency Council Meeting - TODAY [Official - Police]

Hi [REDACTED]

1. My largest concern is that we are not able to stop C19 entering the prison, and prevent us becoming "the cruise ship that docks". We have lots of prisoners with serious UL Health conditions and over 65s. We could flood the hospital with acute cases/needling ventilators. We have isolated [REDACTED] prisoners in this high risk group, however the greatest route in of C19 is now our staff – hence needing to move to PPE to provide a slow down/ "flattening" the infection as much as we can and avoid sending folk into the hospital to ensure space is there for all Islanders. We also want to avoid deaths in the prison which is highly likely should that high risk group of prisoners get C19.

2. PPE is in v short supply and I expect by Mon to have to place all staff and prisoners in face masks to try and slow the entry of C19 into the prison. I am contacting [REDACTED] See comments in point 1 above.

3. Today SoJPS has [REDACTED] staff off [REDACTED]. At present we need support for teachers/ lecturers as we have very few of these and when they go off sick the impact is disproportional. [REDACTED]

4. We have closed visits now to try and reduce routes in for C19. Next step is to have staff/prisoners in face masks- see point 1.

With thanks

Nick

Attachments: image001.png (21.3 KB)

Hi [REDACTED]. Updated below in yellow.

Best wishes

Nick

Overall Summary and State - Amber

- * Closed all visits- installed [REDACTED] more video visits and now free for prisoners during the C19 pandemic.
- * IPMB fully informed of all we are doing and supportive.
- * Curtailed aspects of the regime - due to staff absence and C19 prevention strategy e.g. upstairs gym rooms closed.
- * [REDACTED] off with some expected to return by Monday
- * Many staff anxious about risks to them and family. Assuring, Gov & HC Manager/staff drop in/ Q&A sessions Mon, Wed and Fri. JPSA fully engaged. Working with HR on all options to support our staff. PPE an issue.
- * Changed movements and searching procedures to reduce infection risk and where possible create social distancing. Not always feasible in a prison setting.
- * Prisoners have largely accepted the adjustments and mostly complying with social distancing. They appreciate all the measures we are taking to keep them safe.
- * Prison continues operationally stable at present
- * So far our PROTECT (most vulnerable staff and prisoners) and PREVENT strategy is working. No known infections in the prison to date.
- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing ([REDACTED] last weekend to [REDACTED] and on Wed [REDACTED] to [REDACTED]. [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * No prisoners suspected of having C19 so far

Visitors

- * All visits now cancelled. [REDACTED] new video visits installed [REDACTED] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

- * [REDACTED] IPMB being given regular updates by governor - updated again this morning (doing twice per week)
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone
- * IPMB are supporting the work to manufacture cloth face masks for prisoners and staff mobilising their network of friends and family

Courts

- * ALL now being done via video court. Thank goodness I took the decision to instial [REDACTED] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this. Number of remands fallen. To take forward use of EM for bail with [REDACTED] And [REDACTED]
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we are trying to manage it down and an entry route if for C19
- * The prison population is [REDACTED] plus [REDACTED] CERs. [REDACTED] CER successfully completed this week. The highest it has been for several years. The result of

longer sentences and convictions of several together [REDACTED]

Staffing impact

- * [REDACTED] ([REDACTED]) - Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [REDACTED] staff off Island now returned and self-isolating - back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible. Officer got back safely via Bangkok and now isolating - in figs above
- * [REDACTED] others who are off for sick for existing issues or long term illness
- * [REDACTED] pregnancy/maternity off work
- * [REDACTED] Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [REDACTED] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from [REDACTED] to [REDACTED] absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Next week moving regime to reduced numbers on association and exercise, and moving to [REDACTED] out am at work, education, [REDACTED] association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of Concern

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.
- * Prison setting up manufacture of cloth face masks for all prisoners and staff to slow spread and create as much of a barrier as we can being unable to create 2m at all times in a prison setting
- * Also going to manufacture surgical gowns for the hospital if we can as all PPE is in short supply.
- * The consequence of this may be that the C19 peak of the curve in the prison corresponds with the community peak leading to swamping of ICU. We wish to do all in our means to prevent this.

- * At all times we need to tread the balance of managing the C19 risk, how we may impact or not on the wider islands ability to manage C19 peak, AND maintaining operational stability in the prison. So far we are doing this

Hi Nick

The Minister has another questions without notice in the States tomorrow.

Please could you let me know if the below information still stands or if there are any updates?

In particular, what current staff complement is and how many officers are being affected by COVID-19 directly or indirectly.

Apologies for the late notice but we have only just found out.

If possible, I'd be very grateful if you could get back to me by 9am tomorrow morning.

Kind regards

Importance: High

Hi [REDACTED] Nick, [REDACTED]

The Minister has 30 minutes of questions without notice at an extraordinary meeting of the States on Friday morning.

[REDACTED] would like a short briefing on how each of your services are coping with the COVID-19 outbreak and how your business continuity plans are working.

If it could look something like the short briefing note attached that would be very helpful. If you could get something to me by Thursday morning, I would be grateful.

If there is anything else that you think it would be helpful for the Minister to know then please feel free to include it.

Kind regards

Hi [REDACTED]

Updated slightly below plus call today with [REDACTED] that you were on. Otherwise no major changes.

Best wishes

Nick

Overall Summary and State as at Mon 6 April - Amber now and forecast for next week - Amber

- * Closed all visits- installed [REDACTED] more video visits and now free for prisoners during the C19 pandemic. Exploring another video visit for O65s and ULHC prisoners on E wing and a tablet version for other less mobile prisoners to reduce infection risk/ enhance their protective measures. Reduce movements as much as we can for our most at risk prisoners.
- * IPMB fully informed of all we are doing and supportive.
- * Curtailed aspects of the regime - due to staff absence and C19 prevention strategy e.g. upstairs gym rooms closed.
- * [REDACTED] staff impact- an improved situation compared to a week ago (XX)
- * Many staff anxious about risks to them and family. Assuring, Gov & HC Manager/staff drop in/ Q&A sessions Mon, Wed and Fri. JPSA fully engaged. Working with HR on all options to support our staff. PPE an issue. Meeting JPSA (union) weekly.
- * Changed movements and searching procedures to reduce infection risk and where possible create social distancing. Not always feasible in a prison setting.
- * Prisoners have largely accepted the adjustments and mostly complying with social distancing. They appreciate all the measures we are taking to keep them safe.
- * Prison continues operationally stable at present
- * So far our PROTECT (most vulnerable staff and prisoners) and PREVENT strategy is working. No known infections in the prison to date.
- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing [REDACTED] last weekend to [REDACTED] and on Wed 5 to [REDACTED]. [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * No prisoners suspected of having C19 so far

Visitors

- * All visits now cancelled. [REDACTED] new video visits installed - [REDACTED] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

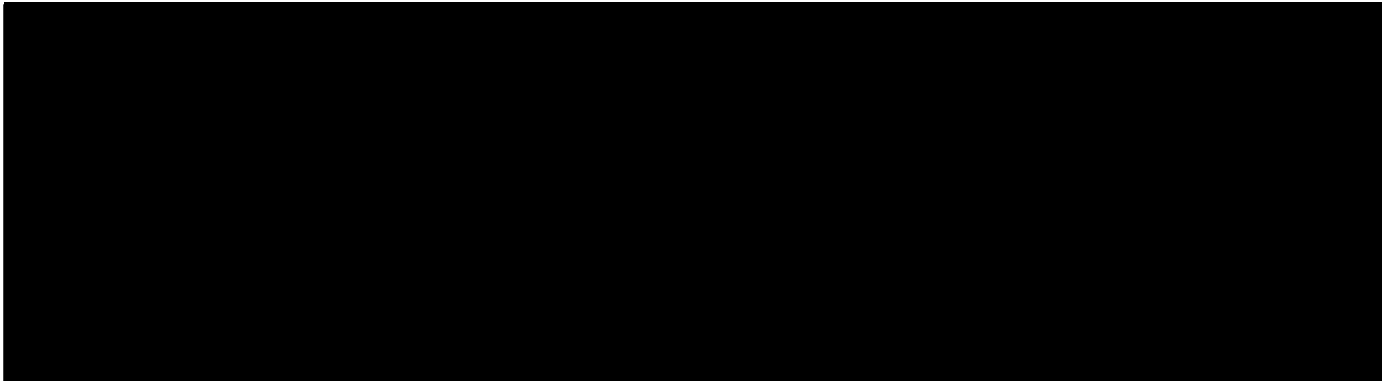

- * [REDACTED] of IPMB being given regular updates by governor - updated again this morning (doing twice per week)
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone
- * IPMB are supporting the work to manufacture cloth face masks for prisoners and staff mobilising their network of friends and family

Courts

- * ALL now being done via video court. Thank goodness I took the decision to install [REDACTED] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this. Number of remands fallen. To take forward use of EM for bail with [REDACTED] And [REDACTED]
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we

are trying to manage it down and an entry route if for C19

* The prison population is [REDACTED] plus [REDACTED] CERs [REDACTED] CER successfully completed this week. The highest it has been for several years. The result of longer sentences and convictions of several together [REDACTED]

Staffing Impact

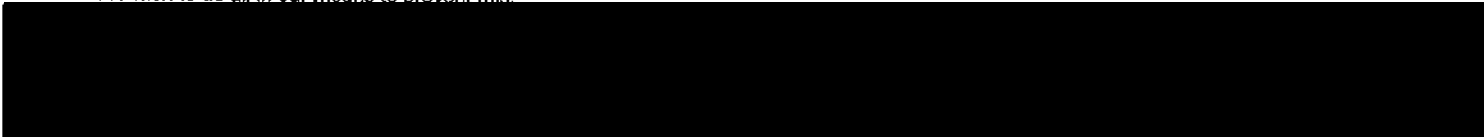

- * [REDACTED] - Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [REDACTED] staff off island now returned and self-isolating - back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible. Officer got back safely via [REDACTED] and now isolating - in figs above
- * [REDACTED] others who are off for sick for existing issues or long term illness
- * [REDACTED] pregnancy/maternity off work
- * [REDACTED] Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [REDACTED] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from [REDACTED] to [REDACTED] absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Mon 6 April commenced regime to reduced numbers on association and exercise, and moving to [REDACTED] out am at work , education. [REDACTED] association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of note:

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.
- * Prison setting up manufacture of cloth face masks for all prisoners and staff to slow spread and create as much of a barrier as we can being unable to create 2m at all times in a prison setting
- * Prisoners preparing beds x 50 for hospital
- * Also going to manufacture surgical gowns for the hospital if we can as all PPE is in short supply.
- * The consequence of this may be that the C19 peak of the curve in the prison corresponds with the community peak leading to swamping of ICU. We wish to do all in our means to prevent this.

* At all times we need to tread the balance of managing the C19 risk, how we may impact or not on the wider islands ability to manage C19 peak, AND maintaining operational stability in the prison. So far we are doing this

- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing (1 last weekend to [REDACTED] and on Wed [REDACTED] to [REDACTED]). [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * No prisoners suspected of having C19 so far

Visitors

- * All visits now cancelled. [redacted] new video visits installed - [redacted] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

- * [redacted] of IPMB being given regular updates by governor - updated again this morning (doing twice per week)
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone
- * IPMB are supporting the work to manufacture cloth face masks for prisoners and staff mobilising their network of friends and family

Courts

- * ALL now being done via video court. Thank goodness I took the decision to install [redacted] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this. Number of remands fallen. To take forward use of EM for bail with [redacted] And [redacted]
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we are trying to manage it down and an entry route if for C19
- * The prison population is [redacted] plus [redacted] CERs. [redacted] CER successfully completed this week. The highest it has been for several years. The result of longer sentences and convictions of several together [redacted]

Early release

- * Developing plans to release [redacted] low risk prisoners some with EM tags. Agreed with [redacted] LOD, SPPP, SOJP, JPACS to proceed developing ROTL without EM. A conf call held today with LOD and SPPP - we agreed to create a short time bound amendment to Prison Rules and a ROTL policy. [redacted] to brief you and the minister. LOD [redacted] will review all drafts.
- * [redacted] would like 30 tags however I don't see the need for so many and we will explore options of 10, 20 and 30 with [redacted] plus 3, 7, 15 victim/witness alert alarms.
- * Conf call on Friday with Police, Probation and email discussion with [redacted] and call with [redacted] for Honorary Police to progress. To progress EM for Bail and Community sentences separately with JPACS, [redacted] and [redacted] SoJPS has no remit for bails or community sentences. We will support this with all the work we have done. We now have 10 tags and 2 victim at the prison that [redacted] and JPACS can use. Finalising with SOJP SOPs for alarm responses in line with UK Police Forces.
- * Expect first 10 tags to arrive week to 2 weeks. Run along similar lines to CER.

Staffing impact

- * [redacted] Staff off today out of [redacted] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [redacted] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [redacted] staff off Island now returned and self-isolating -back to work in next 3-5 days.
- * [redacted] officer stranded in [redacted] Returning by the weekend - if possible. Officer got back safely via [redacted] and now isolating - in figs above
- * [redacted] others who are off for sick for existing issues or long term illness
- * [redacted] pregnancy/maternity off work
- * [redacted] Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [redacted] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from [redacted] to [redacted] absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Next week moving regime to reduced numbers on association and exercise, and moving to [redacted] but am at work, education. [redacted] association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of Concern

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.
- * Prison setting up manufacture of cloth face masks for all prisoners and staff to slow spread and create as much of a barrier as we can being unable to create 2m at all times in a prison setting
- * Also going to manufacture surgical gowns for the hospital if we can as all PPE is in short supply.

Hi Nick

The Minister has another questions without notice in the States tomorrow.

Please could you let me know if the below information still stands or if there are any updates?

In particular, what current staff complement is and how many officers are being affected by COVID-19 directly or indirectly.

Apologies for the late notice but we have only just found out.

If possible, I'd be very grateful if you could get back to me by 9am tomorrow morning.

Kind regards

Hi [REDACTED] Nick [REDACTED] and [REDACTED]

The Minister has 30 minutes of questions without notice at an extraordinary meeting of the States on Friday morning.

He would like a short briefing on how each of your services are coping with the COVID-19 outbreak and how your business continuity plans are

working.

If it could look something like the short briefing note attached that would be very helpful. If you could get something to me by Thursday morning, I would be grateful.

If there is anything else that you think it would be helpful for the Minister to know then please feel free to include it.

Kind regards

Subject: [REDACTED] SoJPS during C19 crisis

Dear Julian

[REDACTED]

1. Provision of PPE. In March, I rightly wanted to ensure the SoJPS staff had the correct PPE [REDACTED]

[REDACTED]

1. Access to testing for SoJPS staff and Prisoners - with the availability of more testing it was raised recently at a MAIC strategy meeting, by both the Chief of Police and I, that our staff should have access to priority testing, so we can get them back to the front line with minimum delay. And for the prison, its prisoners, should we get a suspected C19 case, that we have priority access to testing, so we can rapidly isolate and prevent infection spread. The reasons are well known. Containment in a prison setting is very difficult and if we don't contain we could flood the hospital (ICU especially) as the prison has a significantly higher risk profile (age, ULHCs, Drug taking and Alcoholism) [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] 17 April

"Being prepared for increased infection, and having the resources available to treat and save the lives of as many Islanders as possible underpins

Best wishes

Subject: [REDACTED] SoJPS during C19 crisis

Dear Julian

If I summarise the 3 areas of concern:

"Being prepared for increased infection, and having the resources available to treat and save the lives of as many Islanders as possible underpins

all of our decision making. We will not be putting money before people." <https://www.gov.je/News/2020/Pages/StatementChiefMinister17April.aspx>

I have taken the decision to copy into this note - to the Home Affairs Minister given the staffing issues may be raised by the union, and to ensure our alignment to the [REDACTED] political leadership, [REDACTED] responsibility for the welfare of prisoners. [REDACTED] to support you during this difficult time and perhaps guide on decision making. Finally, I have copied in the Prison Governors Association, my professional body.

Best wishes

Nick

Hi [REDACTED]

Briefing for Len for EC mtg on Friday.

Best wishes

Nick

Overall Summary and State - Amber

- * Closed all visits- installed [REDACTED] more video visits and now free for prisoners during the C19 pandemic.
- * IPMB fully informed of all we are doing and supportive.
- * Curtailed aspects of the regime - due to staff absence and C19 prevention strategy e.g. upstairs gym rooms closed.
- * [REDACTED] staff off this week ([REDACTED] staff) . Many staff anxious about risks to them and family. Assuring, Gov & HC Manager/staff drop in/ Q&A sessions Mon, Wed and Fri. JPSA fully engaged. Working with HR on all options to support our staff. PPE an issue.
- * Changed movements and searching procedures to reduce infection risk and where possible create social distancing. Not always feasible in a prison setting.
- * Prisoners have largely accepted the adjustments and mostly complying with social distancing. They appreciate all the measures we are taking to keep them safe.
- * Prison operationally stable at present
- * So far our PROTECT (most vulnerable staff and prisoners) and PREVENT strategy is working. No known infections in the prison to date.
- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing [REDACTED] last weekend to [REDACTED] and on Wed [REDACTED] to [REDACTED]). [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * [REDACTED] other prisoners isolated but not thought to be C19

Visitors

- * All visits now cancelled. [REDACTED] new video visits installed - [REDACTED] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

- * [REDACTED] PMB being given regular updates by governor
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone

Courts

- * Now virtually all being done via video court. Thank goodness I took the decision to install [REDACTED] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this.
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we are trying to manage it down and an entry route if for C19
- * The prison population is [REDACTED] plus [REDACTED] CERs. The highest it has been for several years. The result of longer sentences and convictions of several together [REDACTED]

Early release

- * Developing plans to release [REDACTED] low risk prisoners some with EM tags.
- * [REDACTED] would like [REDACTED] tags however I don't see the need for so many and we will explore options of 10, 20 and 30 with [REDACTED] plus 3, 7, 15 victim/witness alert alarms.
- * Conf call on Friday with Police, Probation and email discussion with senior mag and call with [REDACTED] for Honorary Police to progress.
- * Expect first 10 tags to arrive week to 2 weeks. Run along similar lines to CER.

Staffing impact

- * [REDACTED] Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated
- * [REDACTED] staff off Island now returned and self-isolating -back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible
- * [REDACTED] others who are off for sick for existing issues or long term illness
- * [REDACTED] pregnancy/maternity off work
- * [REDACTED] Unit Manager off with ULH Conditions (risk assessing to bring back to work)
- * [REDACTED] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from 20 to 30% absent we will have to split regimes to am and pm rotation to ration access to regime.

Areas of Concern

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve"
- * The consequence of this may be that the C19 peak of the curve in the prison corresponds with the community peak leading to swamping of ICU. We wish to do all in our means to prevent this.

- * At all times we need to tread the balance of managing the C19 risk, how we may impact or not on the wider islands ability to manage C19 peak, AND maintaining operational stability in the prison. So far we are doing this

Subject: FW: PRISON - ADVICE REQUIRED
Date: Sunday, March 29, 2020 11:35 UTC
Attachments: image001.png (31.8 KB)

Julian- please see the notes below and the response from [REDACTED]. To be advised to make home-made / DIY masks to prevent C19 infection for prison officers, when 20,000 face masks are now here and more coming, does not seem to address the matter seriously, nor provide a defensible position to ensure the safety and well-being of staff, or prisoners and especially if some die from C19. We must all have done what we can to prevent this and deaths amongst the wider population, that could be caused by prisoner infections impacting adversely on ICU capacity at a critical time.

I assume you understand what we are trying to achieve and its covered in the notes to [REDACTED] below. In summary - we are trying to ensure we prevent C19 infection for as long as possible from entering the prison, and when it does to slow down the infection rate, and keep our most vulnerable prisoners from becoming unwell and blocking ICU beds at a critical peak of infection for the Island as a whole. When we now have 20,000 masks and more coming, to be told to make DIY masks does not seem to recognise this strategy nor provide the protection we need to give to our staff in SoJPS, who deal with prisoners at close proximity every day. After HCS colleagues we probably have the greatest exposure to C19 risks of any other service. We don't have the luxury of social distancing in all we do by the nature a prison. We have taken many measures to protect, distance and isolate, however appropriate PPE is now the next step to Protect, Prevent and Delay. We cant wait for C19 to become widespread in the prison before deploying PPE. It may then be too late to avoid unnecessary infections amongst staff and prisoners, and may lead to avoidable deaths.

The message that we are having to use DIY masks may also lead to prisoners taking the matter to the media or their lawyers for failing to provide adequate protection. The JPSA may also react and could take this to the media or other politicians as they have done before. Some of their members have been asking when will they be issued PPE? To date we have informed them we don't have sufficient PPE on the Island, and are waiting for it to arrive, and we are not at the point of needing it. I now think we have sufficient PPE and with the rapid increase in C19 positive rate and with the anticipated peak in April, we should now deploy widely in the prison for all the reasons outlined. Its not about preferential treatment but recognising risks in the prison which are quite unique, and how we could impact on JGH ICU capacity if we don't get this right.

Your assistance to ensure we have appropriate PPE at the correct time its needed, will be appreciated. We now have sufficient PPE on the Island with more coming and to delay issuing to SoJPS staff seems to be high risk, from many angles. Most importantly, once infected in the prison, it will most likely rapidly spread despite our best efforts, and we may impact on ICU capacity at the peak of infection on the Island, which may cost the lives of ordinary citizens let alone prisoners.

Best wishes
Nick

Hi [REDACTED]

Could we get some of the 20,000 masks for this week, while DIY masks are made up? It would take us a few days/ a week to make up 200-400 DIY masks

Thanks
Nick

Subject: RE: PRISON - ADVICE REQUIRED

1 Hi Nick- aim is to use cloth masks for day to day use; if clinical indication use PPE. Any mask will reduce inoculum size and a small inoculum will better allow the immune system to catch up.- milder infection.

2 have copied [REDACTED] in - [REDACTED] is coming up with 2 designs- need cloth - will be seeking donated cloth

3 any masks will have to be washed and tumble dried to ensure hygiene before distribution - and of course can be dry heat (oven) or wash decontaminated at end of day.

Will revert

Hi [REDACTED]

Ok - what about the 20,000 masks that arrived.

We looked at this DIY option last week but could not proceed due to clinical concerns? And litigation if a prisoner or staff died having worn a diy mask and not a clinically made one?

[REDACTED] has responded and we could mobilise and produce asap. [REDACTED] our [REDACTED] will activate this if we get guidance as to design and clinical/ hygiene issues.

Best wishes

Importance: High

Dear [REDACTED] and [REDACTED]

Given the Island now has 20,000 face masks, would you be able to consider now the proposal for SoJPS to move to face mask wearing for

prisoners and staff, given we have limited means to distance in a prison. Our staff have to enter prisoners cells, and be closer than 2m to prisoners.

To reiterate we are not seeking any preferential treatment but it is driven solely by a desire to ensure the prison doesn't become a major burden on the JGH ICU as the Island hits its peak toward the end of April.

I appreciate the previous reference to care homes as a possible comparison. I suspect it is a flawed one as Social Distancing in a care home, may be much easier than in a prison, where we have [REDACTED] of our prisoners doubled up ie 2 in cell that is 5m square, and the nature of a prison is confined and close contact inevitable.

can I ask you to reconsider and let me know.

Best wishes
Nick

Dear [REDACTED]
Thanks for responding. A call would be appreciated but I know you are busy. My phone remains on 24 / 7 due to my role.

Rest assured I am looking at what the UK prisons are doing and all possible options, including seeing if we can manufacture our own face masks.

I can only flag to you how I think we can best keep from flooding ICU at a critical time and prevent some avoidable deaths, by using PPE along with all the other measures we have in place.

Best wishes
Nick

Hi Nick
I really wasn't dismissing out of hand but just rushing through emails.- we really have got limited PPE only 4400 surgical masks at the moment - trying to get more.
The estimate for HMP is 2100 masks a week
On top of that we have similar concerns in care homes- much older and more frail.
And later increasing numbers.
Can provide aprons and gloves but handwashing all round better- gloves get contaminated just like hands
What are the UK doing- I am sure you have looked at this - but that might give us some ideas.
Happy to discuss but solution cannot be PPE except where needed to look after infected or suspect cases as I see it

Subject: RE: PRISON - ADVICE REQUIRED

Importance: High

Dear [REDACTED]

Please be assured we are doing all the things you suggest and many more. We do however wish to avoid the prison having a large number of prisoners unwell, and as we all know the prison is unrepresentative of the wider population with a high number of prisoners who are older and / or have significant ULH Conditions.

If C19 enters the prison, given the age and ULH Conditions of up to 30 prisoner, we could rapidly overwhelm the hospital with acute cases. Our aim is to avoid this at all costs- hence all the measures we have taken to prevent, protect and delay. And now suggesting some more that may delay longer, and then flatten even more when C19 does enter our population, as it eventually will despite all our best efforts.

As you will be fully aware the prison is different from the community and I would ask that before you instantly dismiss our idea of putting staff and prisoners in PPE to "flatten the curve in the prison" to such an extent we give the hospital capacity to manage the rest of the islands C19 patients as it hits its peak, that we have a conf call to discuss.

I fear failure to keep the prison population out of the Islands C19 peak could lead to swamping JGH ICU and also lead to avoidable deaths in the prison or wider population, as a situation in the prison that was preventable means other citizens don't get access to ICU when needed. We want to take all measures we can to ensure we do not impact adversely on the Islands life saving measures that you are leading.

Please can we have a max 30 min conference call before jumping to the decision of simply -"We don't have that quantity of PPE." We are trying to keep prisoners out of ICU for the wider benefit of all other citizens, we are not seeking any preferential access to something we don't have. We are being responsible and proactive as part of the island wide strategy to save lives.

Best wishes

Nick

We don't have that quantity of PPE.

Can they look at how they can implement social distancing and better hygiene.

May need to separate by time and area. Which means significant alteration in the way they usually operate

Anyone with flu like syms to isolate till end symptoms- surgical mask for inmate & PPE for staff looking after such individuals when in contact

Staff with syms not to come in

Nick Cameron <N.Cameron@gov.je<mailto:N.Cameron@gov.je>>; [REDACTED]>

Subject: PRISON - ADVICE REQUIRED

Afternoon [REDACTED]

I have just spoken to Nick Cameron and [REDACTED]

As you are aware all non-essential volunteers and visiting has stopped

All prisoners 65 years of age and those in the at risk category segregated in a different area of the prison (approx [REDACTED] in total)

Isolation wing set aside for any COVID 19 patients

If officers unwell they are sent home according to COVID-19 criteria

All staff being directed to the helpline for advise (swabbed if indicated)

Prisoners - No suspected cases identified

Prison on amber due to staff sickness

[REDACTED] and [REDACTED] are trying to ensure that everything that can be done to 'flatten the curve' has been implemented.

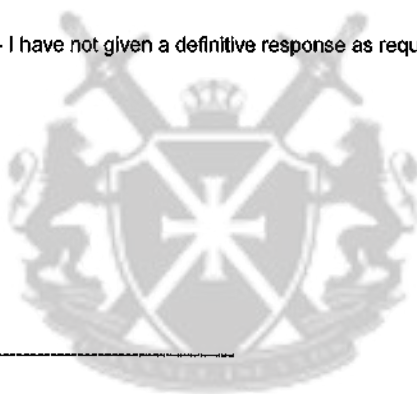

As it is very difficult to maintain distancing between prisoners and officers, and in order to further reduce the risk of cross infection, Nick has asked if the prison officers should be wearing PPE before any significant problems arise.

There are [REDACTED] staff with an estimated [REDACTED] on shift every day (approx. 300 masks / gloves/ aprons would be required daily).

Nick is happy to have a conference call to discuss - I have not given a definitive response as require your input

Kind regards

[REDACTED]

Subject: RE: PPE for Blue Light services and Prison Service

Julian - following your note of 26 March - can you provide an update on PPE provision for JHA. And in the light of the SCG yesterday, where we were all made aware that 20,000 face masks have now arrived, I assume more to follow this week onwards, now the UK supply is being sorted?

Can you confirm that the JHA services will now be provided with appropriate PPE to keep our staff safe and well, to ensure we have as many staff at work and can slow the impact as much as possible to give us all capacity to protect the island as we enter the more acute phase of C19 infections.

Appropriate and timely deployment of PPE will play a major in ensuring we can sustain our ability to deliver, protect the public and ultimately save lives. Failure to deploy in a timely way, when PPE is now available to our teams, may expose them to an avoidable risk, harm and possibly the avoidable death of one of our officers/staff or those in our care.

We all appreciate that to date due to a shortage of PPE, priority has been to ensure HCS colleagues had sufficient and were being prioritised so they could deal with positive cases and those requiring hospitalisation. However, with the 20,000 more masks and other PPE now available, we should now be able to ensure that all front line services are provided with appropriate PPE. JHA services after HCS will have most exposure to C19 infection.

Best wishes

Nick

Good evening [REDACTED]

I am not sure how the blue light services and the Prison Service have approached the issue of PPE, however following the SCG today and as SCG chair I am making a combined request to make available appropriate PPE for emergency service staff and critical prison service staff. This is necessary for their protection, reassurance and those they are dealing with and essential to maximise the opportunity to retain staff at work. Services are approaching [REDACTED] absence rate already and if it increases critical service will be jeopardised. Could you please let me know what the position is to prioritise services and how we can increase the availability of PPE for these services.

Many thanks.

Hi Nick – I think it will work. The Bronze Cell is led by [REDACTED] who is directly linked with the Infection Prevention and Control team who decide who must wear what, for what. They also have full control over all PPE stock coming in to the Island and have firmly centralised it. On that level, while bronze, they are the experts. What we can then do is collate the information via the MAIC and push back from Silver into the bronze cell to tell them our requirements across the whole picture. Where there is contention or a need to prioritise, we can do that at TCG. Will get a status and requirements message out today.

Best wishes,

Hi Nick – I think it will work. The Bronze Cell is led by [REDACTED] who is directly linked with the Infection Prevention and Control team who decide who must wear what, for what. They also have full control over all PPE stock coming in to the Island and have firmly centralised it. On that level, while bronze, they are the experts. What we can then do is collate the information via the MAIC and push back from Silver into the bronze cell to tell them our requirements across the whole picture. Where there is contention or a need to prioritise, we can do that at TCG. Will get a status and requirements message out today.

Best wishes,

From: Nick Cameron

Hi [REDACTED]

Is Bronze PPE the right level for this decision? It is driven by [REDACTED] – Bronze then just allocates?

The key message is – how do prevent / delay C19 from entering the prison, and once it does it will spread quickly, and we ensure acutely unwell prisoners don't block ICU at the critical time of the Islands peak. Get this wrong and we cause avoidable deaths of citizens let alone prisoners.

Thanks for helping

Best wishes

Nick

Subject: RE: PPE for Blue Light services and Prison Service

Julian – following your note of 26 March - can you provide an update on PPE provision for JHA. And in the light of the SCG yesterday, where we were all made aware that 20,000 face masks have now arrived. I assume more to follow this week onwards, now the UK supply is being sorted?

Can you confirm that the JHA services will now be provided with appropriate PPE to keep our staff safe and well, to ensure we have as many staff at work and can slow the impact as much as possible to give us all capacity to protect the Island as we enter the more acute phase of C19 infections.

Appropriate and timely deployment of PPE will play a major in ensuring we can sustain our ability to deliver, protect the public and ultimately save lives. Failure to deploy in a timely way, when PPE is now available to our teams, may expose them to an avoidable risk, harm and possibly the avoidable death of one of our officers/staff or those in our care.

We all appreciate that to date due to a shortage of PPE, priority has been to ensure HCS colleagues had sufficient and were being prioritised so they could deal with positive cases and those requiring hospitalisation. However, with the 20,000 more masks and other PPE now available, we should now be able to ensure that all front line services are provided with appropriate PPE. JHA services after HCS will have most exposure to C19 infection.

Best wishes
Nick

Good evening [REDACTED]

I am not sure how the blue light services and the Prison Service have approached the issue of PPE, however following the SCG today and as SCG chair I am making a combined request to make available appropriate PPE for emergency service staff and critical prison service staff. This is necessary for their protection, reassurance and those they are dealing with and essential to maximise the opportunity to retain staff at work. Services are approaching [REDACTED] absence rate already and if it increases critical service will be jeopardised.

Could you please let me know what the position is to prioritise services and how we can increase the availability of PPE for these services.

Many thanks.

Hi [REDACTED]

Can you also see if we can get access to alcohol hand gel. We cant seem to get any.

We have improvised making our own with plastic bottle sprays and sterilising tablets to create a spray of sorts.

Lots of hand washing going on before anyone asks that obvious question.

Aprons and gloves seem ok.

[REDACTED] is leading on PPE. Can he get a tie in to [REDACTED] And the PPE bronze lead?

Thank you.

Nick

Hi Nick -- I think it will work. The Bronze Cell is led by [REDACTED] who is directly linked with the Infection Prevention and Control team who decide who must wear what, for what. They also have full control over all PPE stock coming in to the Island and have firmly centralised it. On that level, while bronze, they are the experts. What we can then do is collate the information via the MAIC and push back from Silver into the bronze cell to tell them our requirements across the whole picture. Where there is contention or a need to prioritise, we can do that at TCG. Will get a status and requirements message out today.

Best wishes,

Hi [REDACTED]

Is Bronze PPE the right level for this decision? It is driven by [REDACTED] – Bronze then just allocates?

The key message is – how do prevent / delay C19 from entering the prison, and once it does it will spread quickly, and we ensure acutely unwell prisoners don't block ICU at the critical time of the Islands peak. Get this wrong and we cause avoidable deaths of citizens let alone prisoners.

Thanks for helping

Best wishes

Nick

Subject: RE: PPE for Blue Light services and Prison Service

Julian – following your note of 26 March - can you provide an update on PPE provision for JHA. And in the light of the SCG yesterday, where we were all made aware that 20,000 face masks have now arrived. I assume more to follow this week onwards, now the UK supply is being sorted?

Can you confirm that the JHA services will now be provided with appropriate PPE to keep our staff safe and well, to ensure we have as many staff at work and can slow the impact as much as possible to give us all capacity to protect the island as we enter the more acute phase of C19 infections.

Appropriate and timely deployment of PPE will play a major in ensuring we can sustain our ability to deliver, protect the public and ultimately save lives. Failure to deploy in a timely way, when PPE is now available to our teams, may expose them to an avoidable risk, harm and possibly the avoidable death of one of our officers/staff or those in our care.

We all appreciate that to date due to a shortage of PPE, priority has been to ensure HCS colleagues had sufficient and were being prioritised so they could deal with positive cases and those requiring hospitalisation. However, with the 20,000 more masks and other PPE now available, we should now be able to ensure that all front line services are provided with appropriate PPE. JHA services after HCS will have most exposure to C19 infection.

Best wishes

Nick

Good evening [REDACTED]

I am not sure how the blue light services and the Prison Service have approached the issue of PPE, however following the SCG today and as SCG chair I am making a combined request to make available appropriate PPE for emergency service staff and critical prison service staff. This is necessary for their protection, reassurance and those they are dealing with and essential to maximise the opportunity to retain staff at work. Services are approaching [REDACTED] absence rate already and if it increases critical service will be jeopardised. Could you please let me know what the position is to prioritise services and how we can increase the availability of PPE for these services.

Hi [REDACTED]

Via health prevention team overseen by [REDACTED]

With the right PPE we can slow this down. And protect our staff to keep front line services going. From today's SCG all JHA services seemed to show a [REDACTED] staff impact. At present. We need to cap this at [REDACTED] across JHA to all keeping providing a minimum service. [REDACTED] we are all in red/critical and barely functioning. Appropriate PPE will help us all keep to [REDACTED] staff off due to C19.

Best wishes
Nick

Thanks Nick.

As anticipated, availability of PPE kit will undoubtedly be more and more acute, as the virus takes hold. Rather than all JHA colleagues seeking PPE from different sources, is there a single point of contact where we can get access to the protective kit we need for our staff?

Thanks.

Subject: RE: Emergency Council Meeting - TODAY [Official - Police]

Hi [REDACTED]

1. My largest concern is that we are not able to stop C19 entering the prison. and prevent us becoming "the cruise ship that docks". We have

lots of prisoners with serious UL Health conditions and over 65s. We could flood the hospital with acute cases/needling ventilators. We have isolated [REDACTED] prisoners in this high risk group, however the greatest route in of C19 is now our staff – hence needing to move to PPE to provide a slow down/ “flattening” the infection as much as we can and avoid sending folk into the hospital to ensure space is there for all Islanders. We also want to avoid deaths in the prison which is highly likely should that high risk group of prisoners get C19.

2. PPE is in v short supply and I expect by Mon to have to place all staff and prisoners in face masks to try and slow the entry of C19 into the prison. I am contacting [REDACTED] See comments in point 1 above.

3. Today SoJPS has [REDACTED] staff off [REDACTED]. At present we need support for teachers/ lecturers as we have very few of these and when they go off sick the impact is disproportional. [REDACTED]

4. We have closed visits now to try and reduce routes in for C19. Next step is to have staff/prisoners in face masks- see point 1.

With thanks

Nick

Hi [REDACTED]

Via health prevention team overseen by [REDACTED]

With the right PPE we can slow this down. And protect our staff to keep front line services going. From today's SCG all JHA services seemed to show a [REDACTED] staff impact. At present. We need to cap this at [REDACTED] across JHA to all keeping providing a minimum service. [REDACTED] we are all in red/critical and barely functioning. Appropriate PPE will help us all keep to [REDACTED] staff off due to C19.

Best wishes
Nick

Best wishes
Nick

Subject: RE: Emergency Council Meeting [Official - Police]

Thanks Nick.

As anticipated, availability of PPE kit will undoubtedly be more and more acute, as the virus takes hold. Rather than all JHA colleagues seeking PPE from different sources, is there a single point of contact where we can get access to the protective kit we need for our staff?

Thanks.

Subject: RE: Emergency Council Meeting - TODAY [Official - Police]

Hi [REDACTED]

1. My largest concern is that we are not able to stop C19 entering the prison. and prevent us becoming "the cruise ship that docks". We have

lots of prisoners with serious UL Health conditions and over 65s. We could flood the hospital with acute cases/needing ventilators. We have isolated [REDACTED] prisoners in this high risk group, however the greatest route in of C19 is now our staff – hence needing to move to PPE to provide a slow down/ "flattening" the infection as much as we can and avoid sending folk into the hospital to ensure space is there for all Islanders. We also want to avoid deaths in the prison which is highly likely should that high risk group of prisoners get C19.

2. PPE is in v short supply and I expect by Mon to have to place all staff and prisoners in face masks to try and slow the entry of C19 into the prison. I am contacting [REDACTED] See comments in point 1 above.

3. Today SoJPS has [REDACTED] staff off [REDACTED] At present we need support for teachers/ lecturers as we have very few of these and when they go off sick the impact is disproportional. [REDACTED]

4. We have closed visits now to try and reduce routes in for C19. Next step is to have staff/prisoners in face masks- see point 1.

With thanks

Nick

Thanks Julian

We are really all working hard to ensure we keep providing services across JHA. And importantly dont end up blocking icu beds with prisoners that other islanders need who deserve that care. I think we can save islanders lives this way.

Best wishes
Nick

Subject: RE: Healthcare, SOJPS Contingency Staff

Dear Health colleagues

Just a short note to say thank you all for your assistance with support to ensure we have resilience in our small but dedicated SoJPS healthcare team, and also for the face masks ppe for our staff that we received last night.

We are working hard as part of the Island wide response to C19, to PREVENT AND PROTECT C19 from entering the prison, and protecting our most vulnerable older prisoners or prisoners with ULHCs, and ensuring our staff well-being. So far we have been successful, and the extra PPE is very valuable to assist us remaining in the Prevent Phase of our response for as long as we can.

We are poised should we need to move into DELAY AND PROTECT, with our aim to contain and manage C19 infection, ensuring we minimise our impact as much as we can on the Hospital and especially the limited ICU capacity. I know you will support us as much as you can should we detect C19 in the prison and move into DELAY/PROTECT.

My thanks again - it has been heartening to see colleagues across GoJ working so well together, during such challenging times.

Best wishes

Nick

Subject: Healthcare, SOJPS Contingency Staff

Hi [REDACTED],

Just an update of where we are with putting contingencies into place for Healthcare at HMP. [REDACTED] has been busy behind the scenes generating options for us.

I have been given a list of available agency staff. The London based staff are not feasible, therefore I have focussed only on staff currently on island.

I have 'introductory' sessions in place with two chaps, which will take place tomorrow and early next week. This is simply to walk through the routines and the very basic requirements of the [REDACTED] role, and the nuances of working in the prison.
([REDACTED] visiting tomorrow 09.04.20, I hope to speak with and finalise arrangements with [REDACTED] later today).

I also have a new [REDACTED] starting on Monday 13th. This will, I expect, cover worst case scenarios over the coming 6 weeks.

I will of course be in contact with any developments.

Thank you so much for your help with all of this, it's really appreciated.

Hi [REDACTED]

My colleague [REDACTED] has tried calling you.

Please could you let us know if you would like to appoint [REDACTED] for the role of [REDACTED] who is currently working on island.

If you would like to proceed with [REDACTED] we can speak with him this afternoon regarding a start date.

I look forward to hearing from you.

Kind Regards,
[REDACTED]

Subject: RE: Healthcare, SOJPS Contingency Staff

Dear Health colleagues

Just a short note to say thank you all for your assistance with support to ensure we have resilience in our small but dedicated SoJPS healthcare team, and also for the face masks ppe for our staff that we received last night.

We are working hard as part of the Island wide response to C19, to PREVENT AND PROTECT C19 from entering the prison, and protecting our most vulnerable older prisoners or prisoners with ULHCs, and ensuring our staff well-being. So far we have been successful, and the extra PPE is very valuable to assist us remaining in the Prevent Phase of our response for as long as we can.

We are poised should we need to move into DELAY AND PROTECT, with our aim to contain and manage C19 infection, ensuring we minimise our impact as much as we can on the Hospital and especially the limited ICU capacity. I know you will support us as much as you can should we detect C19 in the prison and move into DELAY/PROTECT.

My thanks again - it has been heartening to see colleagues across GoJ working so well together, during such challenging times.

Best wishes

Nick

Subject: Healthcare, SOJPS Contingency Staff

Hi [REDACTED]

Just an update of where we are with putting contingencies into place for Healthcare at HMP [REDACTED] has been busy behind the scenes generating options for us.

I have been given a list of available agency staff. The London based staff are not feasible, therefore I have focussed only on staff currently on island.

I have 'introductory' sessions in place with two chaps, which will take place tomorrow and early next week. This is simply to walk through the routines and the very basic requirements of the [REDACTED] and the nuances of working in the prison.
([REDACTED] visiting tomorrow 09.04.20, I hope to speak with and finalise arrangements with [REDACTED] later today).

Julian- [REDACTED] has found an option to get hold of 20,000 plus masks. They would go into the overall PPE pool HCS are managing. Its beyond my approval limit. And given all the other corro on PPE yesterday and today you will want to decide.

Please let us know asap.
Best wishes
Nick

Hi Nick,

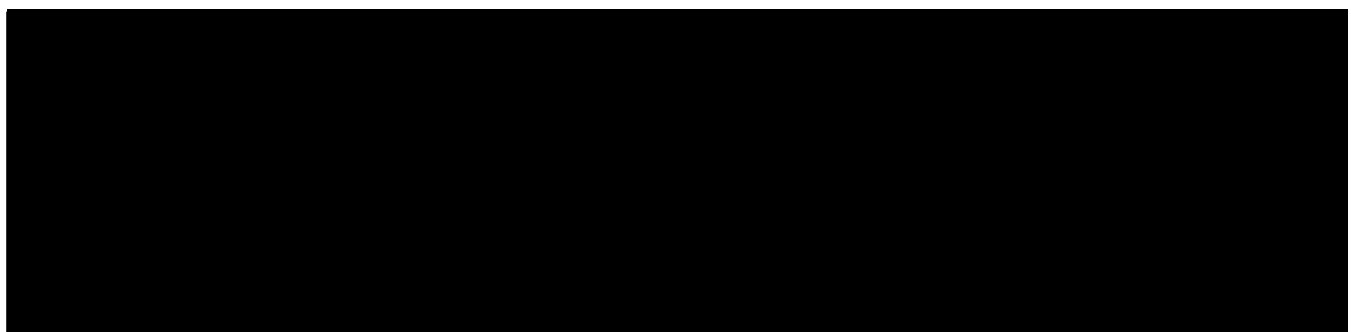

[REDACTED] had a conversation with [REDACTED] and he said he could source 20,000 surgical face masks at 0.45 per unit, total 9,000 + delivery to Jersey of approximately 500, he can also get 10,000 of the N95 masks (provide a seal around the nose and mouth and prevent finer particles) at a cost of 4.50 per unit, total 45,000 + delivery to Jersey at approximately 500. To secure the order he requires a decision by Close of play today as the Americans are buying up everything, let me know if you want to proceed, cheers

Kind regards

Hi all,

Further to [REDACTED] email below. I wanted to chase a loose thread where I believe it was previously mentioned that HM La Moya may be able to help out in the production of cloth face masks. My understanding is that it is highly likely that [REDACTED] will be moving to a more supportive position on the use of homemade masks on Monday next week. A public health policy position is currently with him at the moment.

Just thought it might help in getting ahead of a new emerging curve.

Thanks in advance of any information.

Subject: Face masks guidance

Hi [REDACTED]

As mentioned at the end of today's CAM meeting, we are currently working on updated MOH guidance for [REDACTED] on use of face masks - more positively encouraging people to consider wearing face masks when outside the home. We will link this to information on how to make masks at home, and will designate retailers of fabric and sewing supplies as essential so that people can do it.

[REDACTED] is drafting, and working on how to ensure fit with PPE guidelines.

However we also wanted to give you a heads up because issuing this guidance will probably increase desire for centrally provided masks across essential workers (i.e., to use when guidance suggests no need for PPE, but when outside the home). Wanted to flag- and happy of course to discuss.

Dear [REDACTED], [REDACTED] and [REDACTED]

Unfortunately, I can not make the SCG mtg tomorrow due to another mtg [REDACTED] will represent SoJPS and is fully versed with SoJPS Covid-19 contingency plans.

Noting point 35 in the attached TCG document I am surprised to see that a decision has been made to issue PPE to other JHA services and does not mention the prison service. If police or customs detain someone and they have a risk of Covid 19- the detained person could well be admitted to the prison. we must have an infection risk at this point that is no different from staff in the Police or Customs who may be wearing PPE to manage the offender/detainee?

Also from an infection control / spread perspective the prison is also an extremely high risk area of rapid cross infection with [REDACTED] plus prisoners and [REDACTED] staff living and working in very close proximity. Should Covid-19 arrive on Jersey, the prison will contain prisoners who may be positive and ill, and contagious, until they are acute and need to be transferred to the hospital. These staff - both nursing and officers staffing the unit containing Covid -19 ill prisoners, would need comparable PPE to nursing staff in HCS?

Could I have some assurance that the risk SoJPS staff may be exposed too is treated and understood in the same light as other JHA services and HCS. The issue of PPE should surely be based on risk of exposure? I raised this point at the last SCG - SoJPS officers will have a similar risk exposure to colleagues in SoJP and JCIS, and our HC team to HCS nurses.

I appreciate fully the need to control issue of PPE. My point is from the TCG action log I have now had sight of, and specifically point 35, SoJPS appears to have been omitted from consideration of appropriate PPE?

Best wishes
Nick

Dear [REDACTED]

Many thanks for the advice and our quick discussion pre SCG. Thanks for agreeing to update the TCG actions to reflect SoJPS PPE requirements in line with others, and in accordance with HCS/ [REDACTED] lead on this.

I will also ask [REDACTED] to share with you at tomorrow's TCG and thereafter as we update it, the SoJPS Covid19 contingency planning so you can incorporate it into your action logs and planning as required.

Best wishes

Nick

Subject: RE: Covid 19 planning

Hi Nick,

thanks for the email raising your concerns. Primarily the advice you need would come from Health. The advice for first responders is attached. There may be a bigger piece to pull together bespoke to the Prison service. Can you confirm if the UK Prison service has any specific SOP in relation to this? If not, it may be that a specific piece of work is required. I had previously raised the issue of PPE and asked for consideration of a Health and Safety impact group to be established, however there was little appetite for this.

SOJPS should in my view have access to the the same PPE. This has been sourced from HCS stores at 5 Oaks. HCS may have a view, and interested to understand their view and confirm this is the case.

Maybe [REDACTED] can raise this issue at the SCG this afternoon for specific direction.

Happy to discuss in further detail if required

Regards

Subject: Covid 19 planning

Dear [REDACTED] and [REDACTED]

Unfortunately, I can not make the SCG mtg tomorrow due to another mtg. [REDACTED] will represent SoJPS and is fully versed with SoJPS Covid-19 contingency plans.

Noting point 35 in the attached TCG document I am surprised to see that a decision has been made to issue PPE to other JHA services and does not mention the prison service. If police or customs detain someone and they have a risk of Covid 19- the detained person could well be admitted to the prison. we must have an infection risk at this point that is no different from staff in the Police or Customs who may be wearing PPE to manage the offender/detainee?

Also from an infection control / spread perspective the prison is also an extremely high risk area of rapid cross infection with [REDACTED] plus prisoners and [REDACTED] staff living and working in very close proximity. Should Covid-19 arrive on Jersey, the prison will contain prisoners who may be positive and ill, and contagious, until they are acute and need to be transferred to the hospital. These staff - both nursing and officers staffing the unit containing Covid -19 ill prisoners, would need comparable PPE to nursing staff in HCS?

Could I have some assurance that the risk SoJPS staff may be exposed too is treated and understood in the same light as other JHA services and HCS. The Issue of PPE should surely be based on risk of exposure? I raised this point at the last SCG - SoJPS officers will have a similar risk exposure to colleagues in SoJP and JCIS, and our HC team to HCS nurses.

I appreciate fully the need to control issue of PPE. My point is from the TCG action log I have now had sight of, and specifically point 35, SoJPS appears to have been omitted from consideration of appropriate PPE?

Best wishes

Nick

Subject: [REDACTED] SoJPS during C19 crisis

Date: Monday, April 20, 2020 09:07 UTC

Attachments: image001.png (31.8 KB), RE: PRISON - ADVICE REQUIRED.eml (121.2 KB), SoJPS face masks.eml (40.1 KB), JRF.20200409.Covid-19.SCG.Actions.eml (212.1 KB), RE: HCS Covid 19.eml (149.7 KB), FW: HMP.eml (67.7 KB), RE: Appointments.eml (89.1 KB)

Dear Julian

[REDACTED]
[REDACTED] 17 April

"Being prepared for increased infection, and having the resources available to treat and save the lives of as many Islanders as possible underpins all of our decision making. We will not be putting money before people." [https://www.gov.je/News/2020/Pages/Statement\[REDACTED\]17April.aspx](https://www.gov.je/News/2020/Pages/Statement[REDACTED]17April.aspx)

I have taken the decision to copy into this note - to the Home Affairs Minister given the staffing issues may be raised by the union, and to ensure our alignment to the Chief Ministers political leadership, [REDACTED] to advise on H&S aspects, and [REDACTED] who has statutory responsibility for the welfare of prisoners. [REDACTED] to support you during this difficult time and perhaps guide on decision making. Finally, I have copied in the Prison Governors Association, my professional body.

[REDACTED]

[REDACTED]

Best wishes

Nick

Hi [REDACTED]
Updated slightly below plus call today with [REDACTED] at that you were on. Otherwise no major changes.
Best wishes
Nick
Overall Summary and State as at Mon 6 April - Amber now and forecast for next week - Amber

- * Closed all visits- installed [REDACTED] more video visits and now free for prisoners during the C19 pandemic. Exploring another video visit for O65s and ULHC prisoners on [REDACTED] wing and a tablet version for other less mobile prisoners to reduce infection risk/ enhance their protective measures. Reduce movements as much as we can for our most at risk prisoners.
- * IPMB fully informed of all we are doing and supportive.
- * Curtailed aspects of the regime - due to staff absence and C19 prevention strategy e.g. upstairs gym rooms closed.
- * [REDACTED] staff impact- an improved situation compared to a week ago (XX)
- * Many staff anxious about risks to them and family. Assuring, Gov & HC Manager/staff drop in/ Q&A sessions Mon, Wed and Fri. JPSA fully engaged. Working with HR on all options to support our staff. PPE an issue. Meeting JPSA (union) weekly.
- * Changed movements and searching procedures to reduce infection risk and where possible create social distancing. Not always feasible in a prison setting.
- * Prisoners have largely accepted the adjustments and mostly complying with social distancing. They appreciate all the measures we are taking to keep them safe.
- * Prison continues operationally stable at present
- * So far our PROTECT (most vulnerable staff and prisoners) and PREVENT strategy is working. No known infections in the prison to date.
- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing [REDACTED] last weekend to [REDACTED] and on Wed [REDACTED] to [REDACTED]. [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * No prisoners suspected of having C19 so far

Visitors

- * All visits now cancelled. [REDACTED] new video visits installed - [REDACTED] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

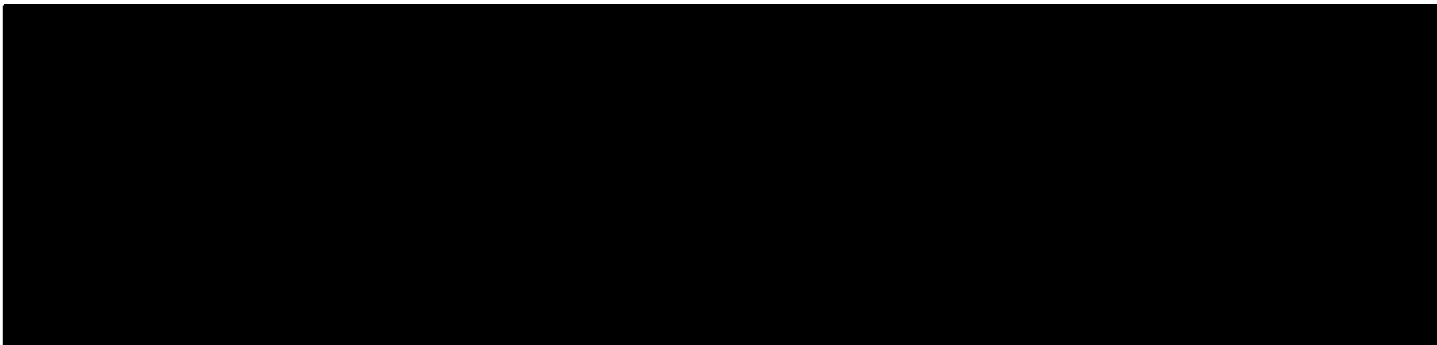

- * [REDACTED] IPMB being given regular updates by governor - updated again this morning (doing twice per week)
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone
- * IPMB are supporting the work to manufacture cloth face masks for prisoners and staff mobilising their network of friends and family

Courts

- * ALL now being done via video court. Thank goodness I took the decision to instal [REDACTED] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this. Number of remands fallen. To take forward use of EM for bail with [REDACTED] And [REDACTED]
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we are trying to manage it down and an entry route if for C19

* The prison population is [REDACTED] plus [REDACTED] CERs. [REDACTED] CER successfully completed this week. The highest it has been for several years. The result of longer sentences and convictions of several together e.g. drugs gangs.

Early release

Staffing impact

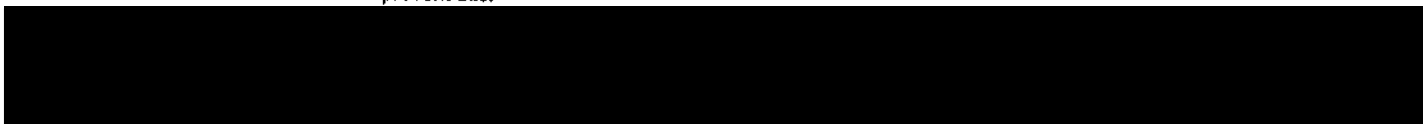

- * [REDACTED] - Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [REDACTED] staff off Island now returned and self-isolating - back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible. Officer got back safely via [REDACTED] and now isolating - in flgs above
- * [REDACTED] others who are off for sick for existing issues or long term illness
- * [REDACTED] pregnancy/maternity off work
- * [REDACTED] Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [REDACTED] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from [REDACTED] to [REDACTED] absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Mon 6 April commenced regime to reduced numbers on association and exercise, and moving to [REDACTED] out am at work, education. [REDACTED] association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of note:

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.
- * Prison setting up manufacture of cloth face masks for all prisoners and staff to slow spread and create as much of a barrier as we can being unable to create 2m at all times in a prison setting
- * Prisoners preparing beds x 50 for hospital
- * Also going to manufacture surgical gowns for the hospital if we can as all PPE is in short supply.
- * The consequence of this may be that the C19 peak of the curve in the prison corresponds with the community peak leading to swamping of ICU. We wish to do all in our means to prevent this.

* At all times we need to tread the balance of managing the C19 risk, how we may impact or not on the wider islands ability to manage C19 peak, AND maintaining operational stability in the prison. So far we are doing this

Hi Nick

The Minister has another questions without notice session in the States Assembly on Thursday. I'd be very grateful if you could let me know if there are any updates to the briefing you have previously sent me by the end of tomorrow so that I can share it with Len.

Thank you and kind regards

Staffing impact

- * [REDACTED] Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [REDACTED] staff off Island now returned and self-isolating -back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible. Officer got back safely via [REDACTED] and now isolating - in figs above
- * others who are off for sick for existing issues or long term illness
- * pregnancy/maternity off work
- * Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [REDACTED] off due to over 65

Regime impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from [REDACTED] to [REDACTED] absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Next week moving regime to reduced numbers on association and exercise, and moving to [REDACTED] out am at work , education. [REDACTED] association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of Concern

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.
- * Prison setting up manufacture of cloth face masks for all prisoners and staff to slow spread and create as much of a barrier as we can being unable to create 2m at all times in a prison setting
- * Also going to manufacture surgical gowns for the hospital if we can as all PPE is in short supply.
- * The consequence of this may be that the C19 peak of the curve in the prison corresponds with the community peak leading to swamping of ICU. We wish to do all in our means to prevent this.

[REDACTED]

* At all times we need to tread the balance of managing the C19 risk, how we may impact or not on the wider islands ability to manage C19 peak, AND maintaining operational stability in the prison. So far we are doing this

Hi Nick

The Minister has another questions without notice in the States tomorrow.

Please could you let me know if the below information still stands or if there are any updates?

In particular, what current staff complement is and how many officers are being affected by COVID-19 directly or indirectly.

Apologies for the late notice but we have only just found out.

If possible, I'd be very grateful if you could get back to me by 9am tomorrow morning.

Kind regards
[REDACTED]

Hi [REDACTED] Nick [REDACTED] and [REDACTED]

The Minister has 30 minutes of questions without notice at an extraordinary meeting of the States on Friday morning.

[REDACTED] would like a short briefing on how each of your services are coping with the COVID-19 outbreak and how your business continuity plans are working.

If it could look something like the short briefing note attached that would be very helpful. If you could get something to me by Thursday morning, I would be grateful.

If there is anything else that you think it would be helpful for the Minister to know then please feel free to include it.

Kind regards

Hi [REDACTED]
[REDACTED] Updated below in yellow.

Best wishes

Nick

Overall Summary and State - Amber

- * Closed all visits- installed [REDACTED] more video visits and now free for prisoners during the C19 pandemic.
- * IPMB fully informed of all we are doing and supportive.
- * Curtailed aspects of the regime - due to staff absence and C19 prevention strategy e.g. upstairs gym rooms closed.
- * [REDACTED] off with some expected to return by Monday
- * Many staff anxious about risks to them and family. Assuring, Gov & HC Manager/staff drop in/ Q&A sessions Mon, Wed and Fri. JPSA fully engaged. Working with HR on all options to support our staff. PPE an issue.
- * Changed movements and searching procedures to reduce infection risk and where possible create social distancing. Not always feasible in a prison setting.
- * Prisoners have largely accepted the adjustments and mostly complying with social distancing. They appreciate all the measures we are taking to keep them safe.
- * Prison continues operationally stable at present
- * So far our PROTECT (most vulnerable staff and prisoners) and PREVENT strategy is working. No known infections in the prison to date.
- * Poised to move to next phase of DELAY should C19 become present in the prison as it inevitably will despite our best attempts to Protect and Prevent.

Prisoners

- * [REDACTED] prisoners move moved to [REDACTED] wing [REDACTED] last weekend to [REDACTED] and on Wed [REDACTED] to [REDACTED]. [REDACTED] prisoners isolated on other wings but cant move due to disability cell requirements. To protect prisoners over 65 and / or with ULH conditions.
- * [REDACTED] prisoner C19 tested last week. Negative result back this week
- * No prisoners suspected of having C19 so far

Visitors

- * All visits now cancelled. [REDACTED] new video visits installed - [REDACTED] now in total. Prisoners given free access to mitigate impact of closing visits and allowing families to maintain contact. Plus all cells have a telephone
- * All volunteers and unnecessary visitors stopped.

IPMB

- * [REDACTED] IPMB being given regular updates by governor - updated again this morning (doing twice per week)
- * IPMB are still looking at prisoner welfare but have amended procedure to see any prisoner via video link or telephone
- * IPMB are supporting the work to manufacture cloth face masks for prisoners and staff mobilising their network of friends and family

Courts

- * ALL now being done via video court. Thank goodness I took the decision to install [REDACTED] video courts last year!
- * With Mag Court closed we hope remands will fall. Provision of EM may help this. Number of remands fallen. To take forward use of EM for bail with Senior Mag. And AG
- * We need to guard against sending C19 breaches/ lock down breaches when activated, to the prison. It may increase our population when we are trying to manage it down and an entry route if for C19
- * The prison population is [REDACTED] plus [REDACTED] CERs. [REDACTED] CER successfully completed this week. The highest it has been for several years. The result of longer sentences and convictions of several together e.g. drugs gangs.

Early release

Staffing impact

- * [REDACTED] Staff off today out of [REDACTED] total staff. Expect this to reduce over the next week as those self-isolating from leave or C19 symptoms return. Could be offset by others who need to self-isolate
- * [REDACTED] staff now self-isolated (No positive C19 staff so far as we know, although some seem to have C19 symptoms. If tested have come back negative)
- * [REDACTED] staff off Island now returned and self-isolating -back to work in next 3-5 days.
- * [REDACTED] officer stranded in [REDACTED] Returning by the weekend - if possible. Officer got back safely via [REDACTED] and now isolating - in figs above
- * [REDACTED] others who are off for sick for existing issues or long term illness
- * [REDACTED] pregnancy/maternity off work
- * [REDACTED] Unit Manager off with ULH Conditions (risk assessing to bring back to work). Now back at work
- * [REDACTED] off due to over 65

Regime Impact

- * Education and library disrupted. Gym closed but main hall and astro still in use
- * Horticulture and workshops open with reduced numbers
- * This will alter rapidly if we have high numbers of staff off. We expect if we move from 20 to 30% absent we will have to split regimes to am and pm rotation to ration access to regime.
- * Next week moving regime to reduced numbers on association and exercise, and moving to 50% out am at work , education. 50% association and exercise, then rotating in the afternoon - to improve control over 2m distancing as not all prisoners complying all the time.

Areas of Concern

- * We would like to move to this as the next stage of our prevent / delay plans but cannot do this due to the shortage of PPE, to ensure we don't swamp JGH ICU at a critical time in "the curve" . We remain in our PREVENT AND PROTECT strategy. So far no positive C19.
- * Ready to move to PROTECT AND DELAY spread.

Julian- [REDACTED] has found an option to get hold of 20,000 plus masks.
They would go into the overall PPE pool HCS are managing. Its beyond my approval limit. And given all the other corro on PPE yesterday and today you will want to decide.

Please let us know asap.
Best wishes
Nick

Hi Nick,

[REDACTED] had a conversation with [REDACTED] and he said he could source 20,000 surgical face masks at 0.45 per unit, total 9,000 + delivery to Jersey of approximately 500, he can also get 10,000 of the N95 masks (provide a seal around the nose and mouth and prevent finer particles) at a cost of 4.50 per unit, total 45,000 + delivery to Jersey at approximately 500. To secure the order he requires a decision by Close of play today as the Americans are buying up everything, let me know if you want to proceed, cheers

Kind regards

Date: Sunday, March 29, 2020 12:03 UTC
Attachments: image002.png (18.4 KB), image003.png (31.8 KB)

Nick,

I have read the email thread and understand your concerns, however we have to manage this carefully and sensibly to ensure the provision of PPE access to advice and prioritisation of decisions is made appropriately. [REDACTED]

and his team are doing an excellent job and are under immense pressure, as any MOH is currently due to the virus. If you have further concerns please let me know.

We discussed yesterday at the SCG the need for coordination of PPE requests, the cell HCS have set up to manage requests and we must follow that procedure. The TCG will coordinate all requests and work with the HCS cell.

The reference to cloth PPE is a way of accessing more PPE and these will be made by firms, not by your staff.

I would ask please you keep your staff in an informed place re the MOH advice, as all your staff do not need PPE and don't need to use it all the time. Other services are having similar conversations with their staff and we need to be measured in our approach. We are doing everything we can to secure more PPE.

You will no doubt continue to manage the prison as we discussed on a call yesterday to mitigate the risks and early prevention measures will assist that in increasing the distancing, longer hours in cells etc, again as we discussed.

Regards

JB

Subject: FW: PRISON - ADVICE REQUIRED

Julian- please see the notes below and the response from [REDACTED]. To be advised to make home-made / DIY masks to prevent C19 infection for prison officers, when 20,000 face masks are now here and more coming, does not seem to address the matter seriously, nor provide a defensible position to ensure the safety and well-being of staff, or prisoners and especially if some die from C19. We must all have done what we can to prevent this and deaths amongst the wider population, that could be caused by prisoner infections impacting adversely on ICU capacity at a critical time.

I assume you understand what we are trying to achieve and its covered in the notes to Ivan below. In summary - we are trying to ensure we prevent C19 infection for as long as possible from entering the prison, and when it does to slow down the infection rate, and keep our most vulnerable prisoners from becoming unwell and blocking ICU beds at a critical peak of infection for the Island as a whole. When we now have 20,000 masks and more coming, to be told to make DIY masks does not seem to recognise this strategy nor provide the protection we need to give to our staff in SoJPS, who deal with prisoners at close proximity every day. After HCS colleagues we probably have the greatest exposure to C19 risks of any other service. We don't have the luxury of social distancing in all we do by the nature a prison. We have taken many measures to protect, distance and isolate, however appropriate PPE is now the next step to Protect, Prevent and Delay. We cant wait for C19 to become widespread in the prison

Well done [REDACTED]

Lets get making them asap.

Any thing to keep preventing C19 in the prison helps

And in the next phase delay the spread. And buy time for our colleagues in HCS.

Thank for the great effort this weekend. On this and the option on 20,000 masks..

Best wishes

Nick

Hi [REDACTED] and [REDACTED]

Can you send specifications to Julian. Procurement are managing. As you would guess we are getting offers from a number of well funded islanders to do similar things.

Julian will then pass onto [REDACTED] team who are procuring ppe..

Thanks
Nick

Hi Nick,

[REDACTED] had a conversation with [REDACTED] and he said he could source 20,000 surgical face masks at 0.45 per unit, total 9,000 + delivery to Jersey of approximately 500, he can also get 10,000 of the N95 masks (provide a seal around the nose and mouth and prevent finer particles) at a cost of 4.50 per unit, total 45,000 + delivery to Jersey at approximately 500. To secure the order he requires a decision by Close of play today as the Americans are buying up everything, let me know if you want to proceed, cheers

Kind regards

Dear Len

We are already doing that. Our [REDACTED] prisoners are making cloth face masks.

Plus [REDACTED] has at my request got the IPMB members, friends and family making them too.

We have also got the prisoner refurbishing old prison beds 50 to go into the field hospital.

We are all in this together and we have got the prisoners playing a part as well. Julian and Comms team ([REDACTED]) have all been made aware.

Take care
Nick

Morning Len

Hope you and the family are well.

I have been in touch with a friend of mine in Texas who told me that the prison inmates were helping out making masks for protection against Coronavirus. Is that something the prisoners at La Moye could do? I think it would be excellent news if the answer is YES

Keep safe and well

All the very best

Well done [REDACTED]
Lets get making them asap.
Any thing to keep preventing C19 in the prison helps

And in the next phase delay the spread. And buy time for our colleagues in HCS.

Thank for the great effort this weekend. On this and the option on 20,000 masks..
Best wishes
Nick

Hi Nick

At our Silver meeting today we've discussed the need for additional Gowns to be produced On Island. One of the suggestions was to check if this is something that prisoners may want to assist with in terms of production.

Would it be possible for [REDACTED] to have a conversation with you about the idea?

Nick,

I am keen to discuss with you alternative plans to keep your business going, what options you have to/can take now to change the layout of the prison, keep blocks of prisoners/staff etc separate, have a separate wing for any new incomers etc. I'm sure you've considered this but would be good to discuss please and see if JHA or gov can assist in any way.

Thank you.

We are really all working hard to ensure we keep providing services across JHA. And importantly don't end up blocking ICU beds with prisoners that other islanders need who deserve that care. I think we can save islanders lives this way.

Best wishes
Nick

Subject: RE: Emergency Council Meeting - TODAY [Official - Police]

Hi [redacted]

1. My largest concern is that we are not able to stop C19 entering the prison. and prevent us becoming "the cruise ship that docks". We have

lots of prisoners with serious UL Health conditions and over 65s. We could flood the hospital with acute cases/need ventilators. We have isolated [REDACTED] prisoners in this high risk group, however the greatest route in of C19 is now our staff - hence needing to move to PPE to provide a slow down/ "flattening" the infection as much as we can and avoid sending folk into the hospital to ensure space is there for all Islanders. We also want to avoid deaths in the prison which is highly likely should that high risk group of prisoners get C19.

2. PPE is in v short supply and I expect by Mon to have to place all staff and prisoners in face masks to try and slow the entry of C19 into the prison. I am contacting [REDACTED] See comments in point 1 above.

3. Today SoJPS has [REDACTED] staff off [REDACTED]. At present we need support for teachers/ lecturers as we have very few of these and when they go off sick the impact is disproportional. [REDACTED]

4. We have closed visits now to try and reduce routes in for C19. Next step is to have staff/prisoners in face masks- see point 1.

With thanks

Nick

reference and hope it is helpful. As soon as I have any confirmation on the specifications I will let both of you know, cheers

A surgical mask, also known as a procedure mask, medical mask or simply as a face

mask,[1]<https://en.wikipedia.org/wiki/Surgical_mask#cite_note-1>[2]<https://en.wikipedia.org/wiki/Surgical_mask#cite_note-2> is intended to be worn by health professionals<https://en.wikipedia.org/wiki/Health_professional> during surgery<<https://en.wikipedia.org/wiki/Surgery>> and during nursing to catch the bacteria shed in liquid droplets and aerosols from the wearer's mouth and nose. They are not designed to protect the wearer from inhaling airborne bacteria or virus particles and are less effective than respirators<<https://en.wikipedia.org/wiki/Respirator>>, such as N95<https://en.wikipedia.org/wiki/N95_mask> or FFP<https://en.wikipedia.org/wiki/Respirator#European_norms> masks, which provide better protection due to their material, shape and tight seal.

Surgical masks are popularly worn by the general public all year round in East Asian<https://en.wikipedia.org/wiki/East_Asia> countries like China, Japan, South Korea and Taiwan to reduce the chance of spreading airborne diseases<https://en.wikipedia.org/wiki/Airborne_disease> to others, and to prevent the breathing in of airborne dust particles created by air

pollution<https://en.wikipedia.org/wiki/Air_pollution>.[3]<https://en.wikipedia.org/wiki/Surgical_mask#cite_note-1-3> Additionally, surgical masks have become a fashion statement, particularly in contemporary East Asian culture bolstered by its popularity in

Japanese<https://en.wikipedia.org/wiki/Japanese_pop_culture> and Korean pop culture<https://en.wikipedia.org/wiki/Korean_Wave> which have a big impact on East Asian youth culture<https://en.wikipedia.org/wiki/Youth_culture>.[4]<https://en.wikipedia.org/wiki/Surgical_mask#cite_note-4-4>[5]<https://en.wikipedia.org/wiki/Surgical_mask#cite_note-5-5>

[File:Understanding the difference between surgical masks and N95

respirators.pdf]<https://upload.wikimedia.org/wikipedia/commons/9/90/Understanding_the_difference_between_surgical_masks_and_N95_respirators.pdf>

Julian [REDACTED] has found an option to get hold of 20,000 plus masks.

They would go into the overall PPE pool HCS are managing. Its beyond my approval limit. And given all the other corro on PPE yesterday and today you will want to decide.

Please let us know asap.

Best wishes

Hi Nick,

██████████ had a conversation with ██████████ and he said he could source 20,000 surgical face masks at 0.45 per unit, total 9,000 + delivery to Jersey of approximately 500, he can also get 10,000 of the N95 masks (provide a seal around the nose and mouth and prevent finer particles) at a cost of 4.50 per unit, total 45,000 + delivery to Jersey at approximately 500. To secure the order he requires a decision by Close of play today as the Americans are buying up everything, let me know if you want to proceed, cheers

Subject: RE: PRISON - ADVICE REQUIRED

Importance: High

Dear [REDACTED] and [REDACTED]

Given the Island now has 20,000 face masks, would you be able to consider now the proposal for SoJPS to move to face mask wearing for prisoners and staff, given we have limited means to distance in a prison. Our staff have to enter prisoners cells, and be closer than 2m to prisoners.

To reiterate we are not seeking any preferential treatment but it is driven solely by a desire to ensure the prison doesn't become a major burden on the JGH ICU as the Island hits its peak toward the end of April.

I appreciate the previous reference to care homes as a possible comparison. I suspect it is a flawed one as Social Distancing in a care home, may be much easier than in a prison, where we have [REDACTED] of our prisoners doubled up ie 2 in cell that is 5m square, and the nature of a prison is confined and close contact inevitable.

can I ask you to reconsider and let me know.

Best wishes

Nick

Cc: [REDACTED]

Subject: RE: PRISON - ADVICE REQUIRED

Dear [REDACTED]

Thanks for responding. A call would be appreciated but I know you are busy. My phone remains on 24 / 7 due to my role.

before deploying PPE. It may then be too late to avoid unnecessary infections amongst staff and prisoners, and may lead to avoidable deaths.

The message that we are having to use DIY masks may also lead to prisoners taking the matter to the media or their lawyers for failing to provide adequate protection. The JPSA may also react and could take this to the media or other politicians as they have done before. Some of their members have been asking when will they be issued PPE? To date we have informed them we don't have sufficient PPE on the Island, and are waiting for it to arrive, and we are not at the point of needing it. I now think we have sufficient PPE and with the rapid increase in C19 positive rate and with the anticipated peak in April, we should now deploy widely in the prison for all the reasons outlined. Its not about preferential treatment but recognising risks in the prison which are quite unique, and how we could impact on JGH ICU capacity if we don't get this right.

Your assistance to ensure we have appropriate PPE at the correct time its needed, will be appreciated. We now have sufficient PPE on the Island with more coming and to delay issuing to SoJPS staff seems to be high risk, from many angles. Most importantly, once infected in the prison, it will most likely rapidly spread despite our best efforts, and we may impact on ICU capacity at the peak of infection on the Island, which may cost the lives of ordinary citizens let alone prisoners.

Best wishes
Nick

Subject: RE: PRISON - ADVICE REQUIRED

1 Hi Nick- aim is to use cloth masks for day to day use; if clinical indication use PPE. Any mask will reduce inoculum size and a small inoculum will better allow the immune system to catch up.- milder infection.

2 have copied [REDACTED] in - [REDACTED] is coming up with 2 designs- need cloth - will be seeking donated cloth

3 any masks will have to be washed and tumble dried to ensure hygiene before distribution - and of course can be dry heat (oven) or wash decontaminated at end of day.

Will revert

Hi Nick

At our Silver meeting today we've discussed the need for additional Gowns to be produced On Island. One of the suggestions was to check if this is

something that prisoners may want to assist with in terms of production.

Would it be possible for [REDACTED] to have a conversation with you about the idea?

lots of prisoners with serious UL Health conditions and over 65s. We could flood the hospital with acute cases/needing ventilators. We have isolated [REDACTED] prisoners in this high risk group, however the greatest route in of C19 is now our staff – hence needing to move to PPE to provide a slow down/ “flattening” the infection as much as we can and avoid sending folk into the hospital to ensure space is there for all Islanders. We also want to avoid deaths in the prison which is highly likely should that high risk group of prisoners get C19.

2. PPE is in v short supply and I expect by Mon to have to place all staff and prisoners in face masks to try and slow the entry of C19 into the prison. I am contacting [REDACTED] See comments in point 1 above.

3. Today SoJPS has [REDACTED] staff off [REDACTED] At present we need support for teachers/ lecturers as we have very few of these and when they go off sick the impact is disproportional. [REDACTED]

4. We have closed visits now to try and reduce routes in for C19. Next step is to have staff/prisoners in face masks- see point 1.

With thanks

Nick
